AI-Native Foundations Course

Thinking and working differently in the age of AI

Why AI Proficiency Is Now a Business Imperative

AI isn't a side project. It's the new foundation of how organizations compete, deliver, and grow. Whether enabling smarter workflows, unlocking insights, or redesigning services, **AI is transforming work at every level.**

But tools alone won't close the gap. **Enterprises need fluency—not just access.**

- **87% of organizations face an AI skills gap** that threatens productivity (Gartner)

- **69% of CEOs see AI as essential** to growth—but only 22% say their teams are prepared (PwC)

- AI now impacts **customer experience, operations, and innovation**—not just IT

The ability to understand, apply, and lead with AI is now core to workforce success.
